

Pro-G™ Systems

EMPOWERS its users,
rapidly **ACCELERATING** competence
while **REDUCING USER COST.**

Tienovix is pushing the boundaries of enhancing the human condition and with technologies distilled through NASA, Tienovix has taken what was once a dream and distributed groundbreaking technology to the world.

- Ⓣ **FORWARD DEPLOYABLE - Interactive Video Conferencing with 3D Overlay**
 - Minimize downtime by letting your field operator video call the engineering expert. That expert sees through the operator's eyes and helps troubleshoot the problem without having to go on location.
- Ⓣ **DRIVE PROCEDURAL CONFORMANCE - Digitalization of Standard Operating Procedures**
 - Create, update, and upload Best Practices and Standard Operating Procedures enterprise-wide or customize for each facility or location.
- Ⓣ **REDUCE INVENTORY COMMERCIAL RISK - Supply Chain Integration**
 - Pro-G™ Systems is compatible with IBM, SAP, Oracle, and other industrial leaders to give your operators access to work field tickets, check off delivery tickets, and the ability to create part requests hands-free while in the field saving time and increasing accuracy.
- Ⓣ **FULLY AUDITABLE - Documented Paper Trail for the Field Operator**
 - Each procedure usage is documented in the cloud with the operator, timestamp, notes, and pictures of chat for audit.
- Ⓣ **ACCELERATE COMPETENCY - Real World Digital 3D-Modeling and Guidance for the Field Operator**
 - We take the procedures and AutoCADs to create a virtual 3D-model of equipment allowing the operator to have precision holographic guidance. This state-of-the-art technology allows the operator to be hands-free and guided every step of the way.
- Ⓣ **HIGH-END GUIDANCE AND CONTROL - Integrate Bluetooth Hardware and Tools**
 - By connecting with your operator's Bluetooth capable tools, he will see the data in the heads-up display. Additionally, the details are recorded in Pro-G™ Systems for later quality control or audit.

ADVANCED HUMAN/MACHINE INTERACTION
